2. Congratulations

Congratulations on the occasion of The Fitr

May all your fasts and prayers be accepted

News Group : international-affairs Date : 2010/09/08

3. E-Government Experts Database Initiated

Recently it has been decided that an OIC e-Government Working Group should be established and held its first meeting late in September 2010. In order to determine the members of this Working Group, an online database has been activated and accessible online through the official SESRIC web site. If you are a high – medium level expert having experience in the management or technical aspects of e-Government application development in either private or the public sectors, please feel free to fill in the online form. SESRIC is planning to utilize this database for determining the members of the OIC e-
Government Working Group as well as for other future events related to e-Government.

4. **the official Registration day entered on the Iranian calendar**

Day the 3rd (Iranian calendar) / December 24th as the official Registration day entered on the Iranian calendar

According to the Office of Public and International Affairs, with the approval of General Council of Culture, Day the 3rd entered as the official Registration Day on the Iranian calendar. This was the first day of Iranian birth certificate to Miss. Fatemeh Irani issued

**News Group : international-affairs Date : 2010/09/22 ساعت : 12:00:00**

5. **Strengthening Cooperation with NOCR is on the agenda in the state Department's Consular**
Strengthening Cooperation with NOCR is on the agenda in the state Department's Consular

According to International Affairs Office, Qashqavi, Deputy Minister for Consular, Parliamentary Affairs, in a meeting with Nazemi Ardakani, Deputy Interior Minister and head of NOCR, outlined the agenda to strengthen Cooperation with NOCR.

visiting the Registration Statistics Data Center, in a meeting with the head, deputies and a group of deputy general managers, referred to areas of responsibility and mission and Consular affairs of Iranian abroad. He also announced the preparation of his area for the respect above.

News Group : international-affairs  Date : 2010/09/27 12:00:00

6. Imam Reza Future Supply Plan

Mehr Imam Reza Future Supply Plan gives Promise of a happy future

According to International Affairs, Nazemi Ardekani head of "NOCR" said, This plan will approach the values and address the administration, referring to Article 29 the state Constitution's requirement to cover all sections of society to the social security insurance.

He continued, " In the early five months this year, 565 thousand and 597 infants
were born from which 450 thousand and 832 born in the cities, 114 thousand and 765 in urban and 114 thousand born in rural areas.

According to Nazemi, the highest birth rate in the early five months in Tehran and the lowest was in Semnan Province

News Group: international-affairs

7. The Opening of Counter offices in Ardabil

Information from 99 percent of households were consistent with facts.

According to International Affairs Office, Mohammad Nazemi Ardakani, the head of "NOCR" in a visit to Ardabil Province referring to polls conducted on the household information collected from the Statistical Center in Iran said, "The 67 million people as expressed in their forms, only one percent was inconsistent with reality."

He pointed to national smart cards in the country of late 1990 stated, "The current national cards is just a profile, but smart cards simultaneously, include license, credit card, banking, and insurance.

According to Public Relation and International Affairs, during the opening the first Counter office, He added, "NOCR is getting requested national identification documents according to its responsibility, but in future the responsibility will be taken on by counter offices."

28. set up of 200 Electronic registration counter offices in the country

Mohsen Karami, NOCR'S identity documents affairs deputy, said: " the
organization's registration status is sovereign and infrastructure, at the congress of registration counter services office and e–government.

Although the e–government has little history in the country but is expanding quickly.

He said one of the objectives of – e government is, the services with lower cost and high efficiency, He added that The National Organization for civil registration assigned the unique number to people as national identification card and a smart national ID card in the future, to provide identify and deliver the services of virtual.

Karami reiterated:" the smart ID card is a key to enter the e-government gate and, the organization, with 11 serving over the counter offices, has taken an important step in reducing the traffic and serving easy to people.

He pointed out that more than 5 services are done by the organization electronically without the attendance of people, e.g. moving house.

The deputy of Identity documents affairs said that they will increase these offices from 82 to 270 in the county during this year.

29. Registration reform bill goes to Parliament

In the first scientific, practical conference on legal experts & deputies of civil registration offices all over the country, Mohammad Nazemi Ardakani said "there is more than 120 million registration documents in the states that they already was stored physically."
He added, the archival documents will be in electronic form and available for experts to facilitate the affairs since the preservation of the information is very important.

Head of NOCR outlined:
1. The development strategies including promoting: the use of national numbers, the office counter services, registration, classification, extent of documentation & registration offices throughout the country as an organization.
2. The mission is vital events (four events) recording, identity documents issuing for Iranians, inside or outside the country, production and publication of statistics and demographic information.
3. The main & central objectives of organization: to establish a comprehensive identification structure of Persians and the electronic system.

He continued: "at the present situation, it is a wide organization and over 600 local offices provide people services in national, direct and indirect, then he pointed to reform the law & said:" since civil and social rights of persons are given by civil registration law, it must be corrected.

Nazemi Ardakani expressed: The low of the civil registration was passed in 1976 and it have been amended in 1984 by parliament. According to the new technologies, the present law can't answer people's needs so the amendment of the law is the first priority of the organization program.

Head of NOCR expressed that the basic research studies have been done to reform the country CIVIL REGISTRATION, He asked the legal deputy of president to do necessary measures to speed its process.

The most important task is the registration of citizen's rights
Deputy of planning, management and human resource development of NOCR, said: "one of the important duties of citizens' rights will happen under the law of the country civil registration."

He referred to 35 years duration of the law passing and expressed:" Human needs have changed over time and the delay in revising the rules is not acceptable.

Mr. Mohebati noted, with regard to the new technologies and increasing electronic local offices across the country, The birth registration within 15 days is not appropriate and this law must be changed.

News Group : international- Date : 2011/07/12 ساعت :
30. Elderly population in the country is 2.9 times

Elderly population during last 30 years (1976-2006) has been increased to 2.9 times. The scale of urban areas in the country has quadrupled & from 800.000 has increased to more than 3.2 million people. Based on reported results of economic and demographic characteristics review of the elderly population in the past, present and future, of the SCI, the increasing elderly population, has been differed in rural areas than in urban areas so that it has reached from 1 million people in 1355 year to 1.8 million in 1375.

The elderly in rural areas is more than urban areas due to migration of rural young population to cities. It is predicted that the elderly population in all provinces during the 15-yeares forecasts (1400-1385) will be always increase.

Elderly male population was older than women in most provinces between the years 1385 to 1390. Nevertheless it is predicted the number of elderly women would be more than men, in all provinces, in the years 1390 to 1400, so that elderly population in the coming years, would be female. The aging and the proportion of the 65 years population in different years will have roughly the same pattern in different provinces in the moment, and according to the United Nations definition of aging population (%7 &more than), just the Gilan and Southern Khorasan has reached to old age in 1385. Also Seven provinces of the country will be of old age, in the coming years (more than %7).

Based on the results of the last census, % 5.19 of the country population are 65 years and older (% 5.38 men and %4.99 women.) Gilan province with 7.30, South Khorasan with 7.03, and Central with 6.86
is the first to third of the most aging population provinces. Systan &Baluchistan with 2.95 percent has the lowest elderly population in the country. According to the population record for 2010, now %8 of world population is aged, %6 in developing and % 16 in developed countries. The life expectancy is 69 years in the world, 77 years in developed and 67 years in developing countries. Changing population age structure will be deepened over the decades in the country, so that the elderly population will be increased and not escape it. Developed countries with more than 15 percent of the aging population are considered important measures of this kind and have fewer difficult, but the matter is that the young age structure will be experienced in our country in the coming years so it will be important to prepare the same arrangements from now. 90/4/18

31. There are 120 million ID documents in the data base of The national organization for civil registration IRIN.

Mohammad Nazemi Ardakani in the congress of registration counter services offices and e-government, said:” The registration organization status is sovereign and infrastructure & in all spheres of political, social, cultural and economic is impact.
What is drowning about the organization in long is an efficient, entrepreneur, and effective enterprise whose role in all areas of the country is providing e-government infrastructure and becoming electronic. Upon Article 10 of the Civil Service Act: our task is deployment of Iranian identify society, production of the daily demographics." He continued: NOCR has 3 core missions: vital events registration, issuance of identity documents and the production and dissemination of updated population statistics"

Also he noted: "there are currently 120 million identity documents that are not available via mail or electronically, which should become electronic & access to them available every time and where" In the following, he expressed our strategies in this regard are:

1- Mechanizing the process of services, means to provide all the conditions that services automated and the people's first reference may reach at least ".

2- Establishing the national archive of electronic documents in our possession.'

3-promoting national number application, since in the world and developed or populous countries, individuals are identified solely through the national numbers

4-Replaceing a national smart card rather than ID

5-Begining to expand counter offices in government within a short time (at the present 80 offices have jurisdiction(even in cities or villages).

He continued to establish counter offices ,several subjects are important:

1- founders and staff that provide registration services and equipment that is used in offices

2- Location of offices should be reduced and physical space is also a way that is causing overcrowding.

3- Protection of classified information for applicants to justify the publication of any classified information is not permitted

He emphasized that at the present, they organized cooperative process to counter offices , in the first step of work, assigned them to receive a national ID card application and in the second ID change demand and a replacement birth certificates OR issuing a possibly replica.
He continued in the final stages, all offices will be converted into counter offices and the payment for counter offices in different cities is not equal and working groups decide not allow it to be extortion.

32. The population, economic jihad and sustainable development conference

The conference on population, economic Jihad and sustainable development was held in Monday 11 July 2011, at the training center of NOCR.

Nazemi Ardakani, the head of the civil registration organization and the other related deputies or directors were talking about the population problems, policies and challenges at the conference.

The important points of the speeches as follows:

Nazemi Ardakani, said: "the population is an opportunity and strong point for country, and planning, management can be considered as a strategic for Islamic republic of Iran for grow & improve".

Also, he referred: "at the present, the experts, universities teachers must notice to the population structure as long-short or medium terms to explain the development of the program".

He said: "on the other hand, it is important that now more than 50 reports are
extracting around population."

At the conference, also, Deputy Director of information technology and population statistic emphasized:" the statistics has changed over the past years so that Iran's population rank is 18 in the world and 10 in the Asia, 3 in the Middle East".

Economical and statistical center deputy told:" economic growth is based on the growth rate of labor force and since the aging population of country is increasing( upon the household, income plans studies), so in the future the cost of health services will increase and health services or social security organization will have faced with serious problems.

The head of Asian population research center and Pacific countries emphasized :"the need is revising policies and demographic trends"& predicted that if the current decline in fertility rates continue we would face with a negative population growth in 1425.

Faculty member and director of population, environment and sustainable development center, at the conference referred:" active population growth has declined to follow the economic growth decline and a serious challenge in the countries economic.

Hojatoleslam Mahdi Rajai, the chief of the center of Islamic pattern said: Iranian progress has required extensive research, he continued that thought, science, spirituality and life are Islamic pattern upon our country great leader and just the spirituality is an infrastructure development.

Registration national's chief said careful planning and programs in provinces and cities to develop and advance the goals of the organization. Also he referred; the programs which they tried to be done desirable are name engineering & document treasure in the cities.

In the congress, Mr. Ansari, the chair's advisor in provinces affairs, outlined monitoring the first 3th strategic program of 90 year was the main aim of congress & said: "to high security ID documents is the most significant duty of NOCR".

Also, he emphasized we considered to enforce ourselves in the human resource development, infrastructure improvement, modern technology & advanced legal framework creating to product effectively.

With The executives of the two-day conference, registration documents treasures opened by the registration chief of the Chaharmahal Bakhtiyari province.

He expressed that in areas of social, economic and cultural the role of registration is quite evident that the registration service in the community
identity is very valuable and useful.

Representative of Supreme Leader Ayatollah Mohammad Reza Nasseri in the mentioned province said the activities of registration, a bottleneck, are as a valuable information for the country. He also thanked and appreciation the acts and activities of the registration organization's as a sovereign and infrastructure organization. Nazemi Ardekani's at the end, awarded the statue of registration as a memorial to representative of Supreme Leader Ayatollah Mohammad Reza Nasseri in charmahal bakhtiary.

37. Statement of the economic Jihad and Sustainable development conference

Ali Akbar Mahzoon General Director OF Statistics, population information and migration Office of NOCR, in the economic Jihad and sustainable development conference was read out the statement.

Statement of the economic Jihad and Sustainable development conference
In the Name of God

The 7 billion today's world are in the way of experience of the demographic transitions and the challenges and associated issues with it. Many of today's developed countries have experienced, low or very low fertility, the consequences of this matter is: population aging, labor shortages, declining populations of native species and so on. In contrast, many developing countries, which are experienced high fertility, that the result of its, increase in the working age population, life and social needs arising from it. So we can say that most of the countries have an imbalance population.

If the population is seen through System approach, the population is structured as a body and should be a dynamic and renewable balance between all its sectors that cannot establish a fixed status of population (e.g. a certain number of the population) given as an ideal stage, because changes in the demographics of the population comes from many other factors including economic, social and cultural change which occurs over time in the affected countries.

In connection with the issue, which is very important, to try the changes in the population must be desirable and appropriate. So the population policy is workable, if balance and proportion of the population is kept. It is necessary to study and maintain the population changes constantly and draw the development landscape, and if the population study shows it is out of its balance, appreciate population policies need to apply.

Required to reach appropriate and optimum population is population change constant observation. And observing changes in demographics and population planning requires detailed demographic data on fertility, mortality and migration, marriage and divorce. It is very important the task of the organizations that collect demographic data, particularly the Civil Registration, Census, and the Ministry of Health and Medical Education.

Population has experienced a lot of changes in various fields over the last century, now is facing, exceeded 74 million population due to our country's past high fertility, with an enormous strain on the working age population. Besides the statistical and demographic evidence shows that the current sustained low fertility made issues and challenges for developing countries that will be important in the future. Despite the experiences of today and tomorrow's prospects, it's time to revise the population policy. Yet, researchers, scholars, administrators and
policymakers thinking about the population utilities e.g. fertile population, family planning, structure and age pyramid, the population distribution, migration, and ...

The organizers of the conference stressed the need to review and revise the country's population policies and in particular we hope that with the assistance of the Government and Parliament as soon as possible to implement this important rule be provided. In order to facilitate this, the proposal of the High Council of Policy and Planning will be presented.

The UN Population, has called 2011, under the title "seven billion world", and we, national organizations and NGO( Non Governmental Organization,) are in place to celebrate the World Population Day and tell :"the population and its needs should be the focus of economic and social policy".

Although the world increasing population, and its boundaries, reaching seven billion people, make numerous challenges and issues for future generations and the today population is over, but poverty, illiteracy, discrimination, hunger, and thousands of other demographic and human issues is not because of only a small increase of the population bordered by seven billion people.

Such matters, as it is very unequal and discriminatory distribution of wealth in the world, should be noticed today. Several reports by the IMF shows that nearly 85 percent of the world's wealth in the hands of only 20% of the total world population and the poorest people around the world are 1/5 billion people, only 1 / 4 percent have the entire world's wealth. What is the origin of all divisions and economic inequality in the world? Is its factor in the origin of capitalism and Western domination of the major achievements of the increasing gap between the so-called developed and developing countries? Are they, hungry giant camping Africa, Asia or Latin America, destroy the environment and natural resources in the world today or more than 16 times the world's natural resources, waste and waste non-renewable by cartels and corporations affiliated with the rich developed countries?

We expect the UN to do so, as if they try to reduce the population and control birth in developing countries or the world's poor, to think a terrible time about reducing the economic gap between the poor in developing countries and the rich in developed countries. If the continuous chains of poverty, deprivation and inequality disappeared in poor communities and
developing world, human rationality certainly lead him to the quantitative and qualitative balance of population and prosperity of the collective will of humanity.

43. Iranian climbing to high rank of human development

General Director of statistic population data & migration bureau of NOCR said: the number of Iranian population is near to 75 million people, the age
structure is changing from young to middle.

The mentioned period is the best ones to accelerate economic develop & growth, we hope with a good programming, use them in an optimal manner.

Upon the last report of UNDP, he added: "the quantities indicator of country has recently grown significantly".

UNDP is a universal organization which prepares important reports for all countries annually & HDI is one of them, there are 3 important factors in this report:

1- The life expectancy at the birth (indicates the health population services)
2- The education & literary level of individuals
3- Economic levels of families

In the following Aliakbar Mahzoon emphasized: "upon the related 2010 report published by UNDP, our country climbed from average human development to high rank & it shows we can manage the quality & quantity of population."

Also he expressed: "based on predictions of the experts & analysts, there is an important point about future structure of population in related to current middle-age. The current figure of GRR, is less than one (almost 85%) .It shows that we reached to red line in the population growth. It is necessary to review the population policies seriously. The fertility rate in 2010 is 1.8 children, reaching below replacement level (2.1), It is an alarm for us and we must restore age structure for future population also the necessary facilities should be planed or prepared. Establishment of supreme council population can help us to determine and adopt the population measures and policies about the subject in the country.

National Smart Card Issuance in the country is a new experience.

According to Fars News Agency, from Birjand city, Mr. Nazemi Ardakani, Chairman of NOCR referring to birth rate said: "country birth rate is 19 per1000 and the death rate is 5.9 per 1000 . He added, however, these rates may be different in all of regions and provinces according to the statistics for each region.

Then he referred to the registration of the marriage and divorce rates in the country & said:" the country's marriage rate is currently 12.1 per thousand and the divorce rate is 1.9 thousand."

He also pointed the country's latest population statistics said: "According to latter statistics, country population is 74.7 million person . The South Khorasan population has been announced 677 thousand person .

Nazemi Ardakani continued:" urban population is over 51 million person &in the South Khorasan this rate is more than 382 thousand person ."

He expressed :" National Smart Card Issuance in the country is a new experience while many countries had successful experiences in this field ,so we try to use the latest technologies in the relative cards Issuance& it have been considered to issue the smart card for all people.

50. Using the latest technologies in the National card
51. Vice Minister and Chairman National Organization for Civil Registration

National smart card will be issued for public
Coordination council of civil Registration was held in south khorasan on 15 October 2011.

Mr Nazemi said: according to the planning, national smart cards will be issued in 2012.

He stated Registration organization is expiring period of modernization.

We want to use the most advanced technologies for issuance of identity papers. We provide population statistics in the daily form for other governmental agencies to use it.

We are trying to do inquiry as a web service all over the country. Inquiry is the only way to combat forgery.

We have been done serious efforts for confirmation of identity documents.

One of these measures is the mechanization of the issuance of birth certificates throughout IRAN.

Another action is issuance of smart card that it has very high security.
2010 Statistical Yearbook of NOCR was published & released in the country.

The 7th Statistical Yearbook of registry; containing demographic information, vital events: births, deaths, marriages, divorces, and some other activities of the personal statuses registration organization were published.

The 2010 Statistical Yearbook is the 7th & has a special specification, using the reports system of country population database.

It is based on the last performance & information of registry offices over the country in 2010 and consists of four chapters:
1-Birth

2-Death

3-marriage and divorce

4-statistics of some other important activities.

The level of statistical information in the Yearbook is based on the whole country, province and the city and the statistical review and analysis of each of the critical events in 2010 has provided for its users.

65. The Minister of the Interior in the National Conference on Civil Status Registration Day

The Minister of the Interior in the National Conference on Civil Status Registration Day said :"More than one thousand major and secondary branches have been established to register PM candidates."

Mostafa Mohammad Nadjar The Social Reporter of Fars News reported that Registration Day, as held at in the today National Conference on Civil Status that: Registry of vital the International Conference Center of IRIB stated Iranians, production and events and confirming Identity Documents of the the three essential release of human and population changes statistics are double the missions of the Civil Status Registration Organization that
existence importance of the Organization

“During recent years, this Organization has provided substructures for E. government and in this respect, it has established suitable grounds for achieving the 20-Year Perspective Decrees” continued the Minister.

“Development of trustable information in this organization is a grave responsibility that all should try to update it every day; as the basis of any planning is to having correct information” added the Interior Minister.

The Minister stated that information of this Organization on occupation, housing, marriage and any activities that are considered for the present and future generation is a necessity and continued: “If information is not accurate, any plan and program that lacks information and schedules will be a waste of country’s resources.”

The Interior Minister informed that various plans are needed for the developing of the country and in this respect, proper statistics and exact information is needed, adding: “The Islamic Republic of Iran has taken some measures that have changed it to a global and regional model and the impacts could be seen even in Capture Wall Street Movement.

“The significant successes we have already gained in different industrial, scientific and medical fields are due to the goal-oriented planning we made in our country.” He continued.

**Issuance of birth certificates for martyrs was an interesting innovation.** The Minister stated: “Issuance of birth certificates for martyrs was an interesting innovation. Whatever we have is because of our martyrs and this includes continuing the path of the Late Imam (Khomeini) as well as the gains we had in the light of self-sacrifice of them (the martyrs) that our country is progressing.”

Nadjar said: “A suitable planning for future requires knowing and collecting useful information and the role of Civil Status Registration Organization as the primary core of initial and on time production of information on vital events is the origin and basis of security production and publication that could be used along with other register able information.”
He added: “In line with subsides orientation, this Organization has been doing good activities and to this time, it finished its mission with good speed and favorable way.”

Informing that national ID. Number coverage as an entry key to E. government is the basis of transactions of other organizations, he stated: “Reducing physical reference of people and planning national intelligent ID as the substructure of E. government will be seen performed in Qom province, as one of the valuable achievements of Civil Status Registration Organization, continued Mr. Nadjar.

According to Mr. Nadjar, the national intelligent ID. Card will flow a fresh blood in the veins of government.

The Interior Minister addressed forgery of documents by noting promotions in security factors and said: “Completion and updating population information of the country should be used particularly in development plans of the country in order to realize justice-focused motto.”

He continued: “In addition, respecting clients at this organization, as one of the most frequent visited executive bodies should be followed up desirably and care must be taken to save people from any unnecessary complication and hardship.

The Minister added:” Civil Status Registration Organization should be in conformity with needs and must take steps towards completing the population basis of the country and stay updated.

“As the identity documents are kept safer and more reliable, the economic relations would face fewer problems and good efforts have been done on this subject. We have already succeeded in lowering documents forgery to minimum, compared to past year; however, our plan should be to lower forgery to zero.” He added.

Expressing views on the coming election and its high important, the Minister said: “The National Day of Civil Status Registration was opened by the order for starting candidacy registration; and presently one thousand major and secondary branches have already been established to register candidates,
of this number 207 branches are placed in governor general offices.”

“Parliament, as the highest legislative source of the country has a special place and its election is very important. The experiences of 29 elections and polls in the country have proved that people would appear in scene to give votes in the worst conditions and in long lines.” Added Mr. Nadjar.

Mr. Nadjar continued by expressing hope of having the elections more glorious than before stated: “People have always been actively present in basic decision makings of the country and with no doubt, they will show a significant participation in this election as well; because, it is their legitimate right of being involved in determining their own faith.”

He continued: “On the other hand, the very popular support to the system has become a target for the enemies of the system and in last election; they did their maximum power to prevent people’s participation or did their best to either make it less or minimize it as much as possible.”

Mr. Nadjar said:” In the coming election, we will take the same approach. They (enemies of the system) have nothing than spreading hopelessness and making doubts and try to question the servers of people; but all their efforts are in vein because our people know their enemies fairly well and by participating in this election, they will punch the mouth of their enemies.”

The Interior Minister remarked: “In this condition, all who love this system should direct the atmosphere towards peace and prevent any chance of making enemies strong. “

He said: “Efforts to be done to prevent any challenging statements and since the heads of Civil Status Registration Offices are present in the executive councils, the Civil Status Registration Organization should show an active presence in enquiring and ascertaining the authenticity of candidates’ identities and play their roles.”

109. Increasing Marriage Age is the main cause of Decreasing Reproduction

Increasing Marriage Age is the main cause of Decreasing
Reproduction

Ali Akbar Mahzoon, the general manager of the office of NOCR statistics and demographic information said: the pattern of marriage has the first function in the major population changes and regarding development issues increasing marriage age is the main factor in reproduction.

He added: Previously, children were considered as the wealth of family, so more children meant more wealth. However, the life style has been changed nowadays so, children are not considered as family wealth, instead, more children means more expense because family should provide their life and education expenses. It causes decreasing the number of family children. At present, the quality of children life is very important for parents and they want their children to have the best facilitation.

He emphasized that pursuing a coherent programming in economic issues and considering economy in reproduction causes increasing the reproduction rate in countries.
